

CLOUD

CURATED LIBRARY ABOUT OPIOID USE
FOR DECISION-MAKERS

PTACC 2nd Annual Deflection and Pre-Arrest Diversion
Conference

Ponte Vedra, Florida

November 10-13, 2019

CLOUD Overview

- CLOUD: Curated Library about Opioid Use for Decision-makers
- Purpose: To create and maintain a centralized online repository of actionable information for those on the forefront of addressing the opioid crisis
 - User-friendly
 - Openly Accessible
 - Carefully Curated
 - Evidence-based
- Target audiences:
 - Policymakers & Community Leaders
 - Payers & Providers
 - Patients & Caregivers

CLOUD Overview

- Grant funding provided by the Consumer and Prescriber Education Grant Program (CPGP) established through a 50-state attorney general consumer protection settlement.
- Strategic partners include National Governors Association and Milbank Memorial Fund
- Administered by [The Center for Evidence-based Policy](#) at Oregon Health & Science University
- 28 month project timeline through December 2020 with potential for future funding
- 700+ resources and counting!

CLOUD Distinctive Features

SEARCHABLE DATABASE

Sophisticated yet straightforward search capabilities

FEATURED COLLECTIONS

Aggregated resources on topical issues and innovative approaches

EVIDENCE-BASED

Inclusion criteria & evidence-ranking system to ensure the highest quality of materials

ACTIONABLE MATERIALS

Policy reports, program evaluations, patient and provider education materials, toolkits, practice guidelines, legislative resources, infographics, videos, websites links, and more

Evidence-Ranking System

Ranking	Description
Proven	The intervention or program has demonstrated effectiveness through two or more rigorous, well-conducted studies or program evaluations where the preponderance of evidence indicates significant positive change in a clearly identified outcome or process measure AND the intervention or program has been implemented and evaluated in real-world settings with documented and sustained benefits to individuals or communities.
Promising	The intervention or program has demonstrated effectiveness either through one well-conducted study OR evaluation in a real-world setting with objective documentation of benefit to individuals or communities. These interventions might need further study to demonstrate application to multiple settings or more experience to document the elements needed for implementation fidelity.
Potential	The intervention or program exhibits either some evidence of positive outcomes with limitations in the evaluation/ evidence design OR has been implemented in real world settings without objective documentation of benefit. The theoretical model behind such interventions or programs should be sound and lead one to expect a benefit from the intervention.
Problematic	The intervention or program does not provide evidence of significant benefit, or demonstrates potentially harmful effects. This category also includes practices that have been implemented in real world settings and documented as ineffective or harmful.

Advisory Committee Membership

- National Association of Attorneys General
- Center for Health & Justice at Treatment Alternatives for Safe Communities
- Overdose Lifeline, Inc.
- National District Attorneys Association
- National Association of Counties
- Coda Inc.
- Dept of Justice - State of Oregon (Opioid library Grant Manager)

Material Submission

- Call for submissions and ideas for inclusion consideration:
 - Policy road maps
 - Studies of initiatives and innovative community strategies
 - Educational materials prepared by organizations and state partners
 - Links to online resources and initiatives
 - Other publicly available materials
- To submit resources, visit opioidlibrary.org/submissions
- Helpful information to include in submissions:
 - Citation/Source Information
 - Location of source (file upload or web address)
 - Funding source

Join us in growing the library by submitting materials or having us present the website to your organization!
